WE ARE PART OF A COMPETITIVE FAST CHANGING MARKETPLACE AND WE WANT TO BUILD THE FUTURE TOGETHER WITH YOU

Our goal is the development, innovation and stability of the company, while maintaining our current leading position in Europe. We want to create a strong European aftermarket with our current wide range of products, while also working on this research and development.

We specialize in the organization, financing and transportation of goods from the manufacturers of parts, accessories and tyres to local distributors.

Our International logistics is based in three main warehouses in Poland:

The European Centre for Development and Logistics ILS in Zakroczym – total area 64 000 m², serving a network of distribution for central, northern, and eastern Poland as well as countries such as: Lithuania, Latvia, Estonia, Ukraine, United Kingdom, Ireland, and Finland.

ILS Sosnowiec – total area 63 000 m², serves southern Poland and the southern neighbors of The Czech Republic and Slovakia.

ILS Komorniki – total area 18 000 m², serves Western Europe and countries such as: Belgium, France and Germany among others.

Since the foundation of our company, all our activities have been based on the principle of providing our customers with the highest quality services. Thanks to this, in our first 8 years, we left most of our domestic competitors behind, today we are one of **the leaders in Europe in logistics for automotive aftermarket industry.**

as a MULTI-TASKING PLATFORM

It is a multi-platform, offering a compare engine, possibility of creating offers, cost estimates, a collection of product data sheets, instructions and many other functions which will be useful to you, not only in the office, but especially when you are standing in the garage, next to the car.

mobile alternative
for Catalogue Online;

best tool
on the market
for finding and ordering parts;

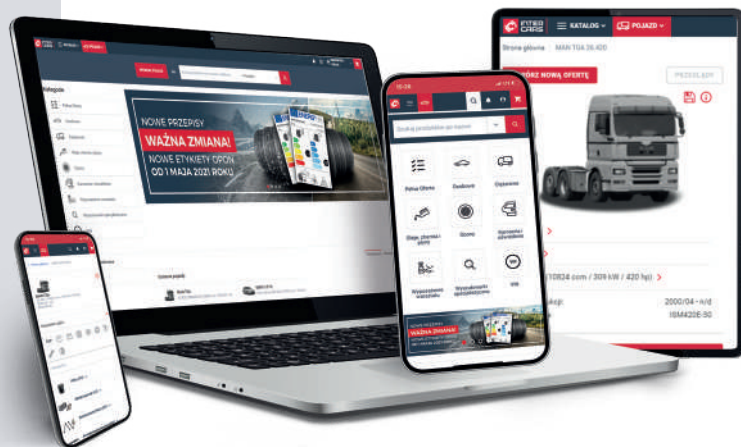

application which allows
constant monitoring of an
order, even when one has no
access to a desktop computer;

extensive catalogue, that you can have with you at any time and in any place;

- use on any device
- find vehicles by VIN number
- easily find products by names and SKUs
- find parts conveniently
- order parts quickly
- manage your orders by creating offers
- browse order history
- be up-to-date with notifications

RESEARCH AND QUALITY CONTROL

Our laboratory was founded **in 2005**. Its purpose is to verify the conformity of spare parts with a high-quality standard, this must be met by all our automotive components.

We have created the testing procedures

We have built an effective, advanced quality control system in accordance with Polish and EU standards

We have implemented verification procedures for each product before introducing it to the range

We have created a control system that allows us to choose the best automotive components manufacturers

Inter Cars Quality Control System deals primarily with:

- **conducting ongoing tests on parts** before placing them for sale,
- **ongoing control of automotive components supply** in terms of quality and functionality,
- **investigation and analysis of complaints** to determine the cause of malfunction.

Inter Cars is one of the few distributors in the European automotive market that have **implemented the quality control system**.

Inter Cars cooperates with **Intermeko Laboratory**, which has a competent research team and is equipped with professional tools that meet all requirements.

Quality Control System implemented by Inter Cars is designed to eliminate products that may pose a threat to the health and life of users.

We deliver not only spare parts but also focus on providing our business partners with full service in the form of know-how, tools, garage equipment and trainings.

Together with our Customers and Suppliers we are building a strong, independent aftermarket of automotive spare parts in Europe and the main shareholder, the founder of Inter Cars - the Oleksowicz family, guarantees many years of commitment and industry expertise.
